# WHY DO PEOPLE SEEK BODY TREATMENTS?

Proven benefits for physical and mental wellbeing

# THE EVOLUTION

## of massage treatments

- **Manual treatments**

Manual techniques have been tried and tested for centuries; however, the results depend on the qualifications of the specialist. Highly skilled specialists are scarce and expensive.

- **Mechanotherapy**

Vibrocompression by spheres and LED-therapy is in the core of RSL Sculpting® by Beautylizer® – the treatment with clinically proven effectiveness for non-invasive body sculpting, 10x more effective than manual techniques. It harnesses the power of rotating spheres and light to help achieve a comprehensive goal of better body contours as well as overall wellness and health.

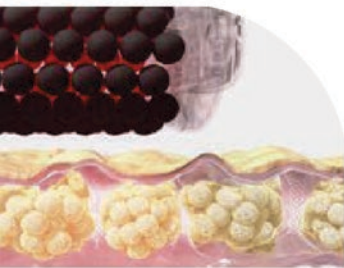

- **AI-assisted robotherapy**

The pinnacle of our evolution in massage treatments is the Robosculptor®: new body therapy assistant that takes care of the routine treatments. It is an autonomous vibrocompression therapy station that delivers consistent results patient after patient. Vibrocompression supercharges your massage experience, and the robotic technology makes it predictable, comfortable, safe, and affordable.

# VIBROCOMPRESSION TECHNOLOGY

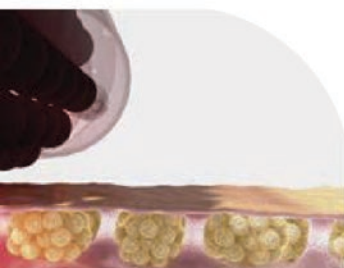

Vibrocompression method is based on two forces working simultaneously to deliver maximum impact: **MICROCOMPRESSION AND VIBRATION.**

Rotating spheres generate sequences of short-term compression and lifting, creating a lymphatic pump effect. Constant oscillation of the roller and the spheres creates vibration, stimulating skin and underlying tissues

The impulses generated by vibration and compression activate the maximum number of mechanoreceptors, stimulating the decomposition of the fatty acids and change in fiber orientation.

The process affects all layers of skin and deep tissues, profoundly improving blood circulation and lymphatic flow.

This unique technology was introduced in 2012 and since then has been proven effective by scientific studies, extensive research and cases around the world.

Immediately after the first session fluid filtration rate is increased, drainage or intercellular spaces is deepened.

# THE REVOLUTION

Meet **ROBOSCULPTOR®** —  
your new body therapy  
assistant

- 🌀 It works 24/7
- 🌀 It delivers consistent quality of the treatment
- 🌀 It follows tailored protocols precisely
- 🌀 It is gender-neutral
- 🌀 It has no consumables
- 🌀 It is easy to operate

# WHY SHOULD YOU HIRE THE ROBOT?

- **To save money**

It will cost 3.800 euro a month for 60 months. After that the robot works for free\*. Keep in mind that the robot doesn't take vacation or sick-days. It is a loyal partner for your team that takes care of those peak times when the capacity is maxed.

\*The estimate is based on the lifetime value and varies depending on the financing terms.

- **To make customers happy**

The robot allows the patient to choose a customised protocol. It will remember the settings and deliver exactly the same quality massage every time the patient comes in for the treatment. The efficiency and the progress in the course of the treatment is measured precisely with the help of the infrared camera that records the body temperature.

# WHAT CAN ROBOSCULPTOR® DO FOR YOUR CUSTOMERS?

- stress relief
- relaxation
- improved sleep quality
- enhanced mood
- mental wellbeing
- pampering and self care
- improved circulation
- improved posture and flexibility

- lactate removal
- muscle soreness
- stiffness and tension relief
- muscle recovery and injury prevention
- pain relief
